ageing :

Due to its balance, this wine can be matured in the bottle for another ten years.

in the vineyard :

Grapes were harvested from two blocks on our Groote Zalze farm. Each block contributing its own, unique character to this wine. Intense canopy management during the first part of the growing season included leaf breaking in the bunch zone. Open canopy ensured even ripening and stable colour. Green harvest was done at 80% veraison. Due to the deep clay rich soils, no additional irrigation was necessary.

about the harvest:

Grapes were hand harvested early in the morning.

in the cellar :

Grapes were de-stemmed and berry sorted before going to stainless steel tanks. After a three-day cold maceration, fermentation started after the wine was inoculated with selected yeast strain. The perfect structure in the wine was achieved through a combination of open and closed pump overs. Shorter pump-overs were done every 4 hours. Maturation took place for 24 months in 100% new French oak barrels.
